

**We've met
before**

FUJITSU

Although you may not realise it, many of the computer systems you use every day are powered by Fujitsu.

From high street retailers and banks right through to energy companies and government departments, we're behind some of the country's largest brands and institutions.

In fact, for over 50 years, we've ensured that the UK's most critical infrastructure operates smoothly, 24/7, whatever's happening in the world.

Here are just a few examples of where we've met before.

With you every day

We work with UK energy companies to ensure the lights stay on, and kettles keep boiling, across more than 15 million households and businesses.

Every year, we enable UK lenders to issue mortgage offers worth over £30 billion, allowing people to buy their dream homes.

During challenging times, when mortgage payment holiday requests peaked, we introduced innovative automation to help banks respond faster to those facing financial hardship.

People living across a third of the UK's land mass rely on our cyber security services for the safe, reliable provision of clean water.

FUJITSU

And when remote working became the 'new normal', we supported hundreds of thousands of UK employees to switch seamlessly to home working.

Keeping the tills ringing

With our help, a leading UK supermarket chain serves over 9 million customers a week across nearly 500 stores.

We're working with a leading personal health retailer to transform in-store technology at their 900 branches across the UK, improving both employee and customer experience.

A close-up photograph of a person's hand holding a black smartphone. The background is a blurred retail display of various mobile phones on a white surface.

We've helped the UK's
biggest and fastest mobile
network, introduce a
consistent, modern
employee and customer
experience across their
500+ high street shops.

Our technology support enables **Whitbread** to welcome over 5 million guests a month across their UK estate of over 800 hotels. So, if you've checked in with them, you've checked in with us too.

With you on your travels

Our digital ticketing solutions enable more than 100 million rail journeys every year across the UK.

Working with UK transport operators, we process over 1 billion contactless transactions each year.

We've helped digitise the UK national rail network, using automated technology to identify faults and save engineers time when undertaking asset surveys.

Delivering technology to ensure a smooth end-to-end airport experience for travellers using London Heathrow Airport.

We manage the charging platform used by over 4 million Giffgaff mobile subscribers – and we all know how crucial smart devices are!

Keeping us safe

We're working at the highest levels of security within the UK Government, including Defence and law enforcement, to protect our critical national infrastructure.

Our technology enables the UK's border authorities to process over 100 million entry checks every year.

We provide the UK's Police National Computer, giving secure 24/7/365 access to 15 million personal records, 65 million driver records and 70 million vehicle records.

Our secure network services enable more than 250,000 Ministry of Defence staff to access critical digital services across 1,100 UK and overseas locations.

We ensure 5 million people living in flood-risk areas receive rapid alerts on potential threats through the UK Environment Agency's Flood Warning System, protecting homes and saving lives.

Our systems have enabled over 40,000 new customs declarations a month, simplifying the movement of goods between Great Britain and Northern Ireland following the UK's exit from the EU.

Moving forward

We're helping to create an interconnected world that works for everyone.

Our ground-breaking quantum-inspired computing techniques are slashing drug discovery lead times from 15 months to just 7 weeks, supporting healthy living for individuals and communities.

We're helping clean up debris in space (yes, outer space), reducing the threat of damage to vital communications satellites.

Using Artificial Intelligence,
we're speeding up the
detection of manufacturing
faults for GKN Aerospace,
getting new aircraft
flight-ready faster.

A blurred background image of a computer lab or office setting. In the foreground, a person's hand is visible on a computer mouse. In the background, a man in a blue shirt is standing and looking at a desk. The image is partially covered by a red and blue gradient overlay on the right side.

We're investing in Education
Ambassador Hubs to create
the skills needed for the
workforce of the future.

Our purpose is to create a more sustainable world where anyone can advance their dreams. It's this ambition that drives us every day.

Supporting everyday life across the UK

As you see, we've met before.
You just didn't know it.

Everywhere from critical government services through to high street stores, we're helping UK organisations deliver the services that connect, empower and safeguard our future.

We look forward to meeting you again, very soon.
