

# Actions on SDGs

SDGs (Sustainable Development Goals) adopted by United Nations in 2015, are global common targets that companies, communities and governments all over the world need to take actions hand in hand to achieve by 2030.

We, Fujitsu Frontech Group, are willing to contribute to the achievement of SDGs, by establishing and practicing “Fujitsu Frontech Purpose” as well as by following Fujitsu Way, the principle in Fujitsu Group.

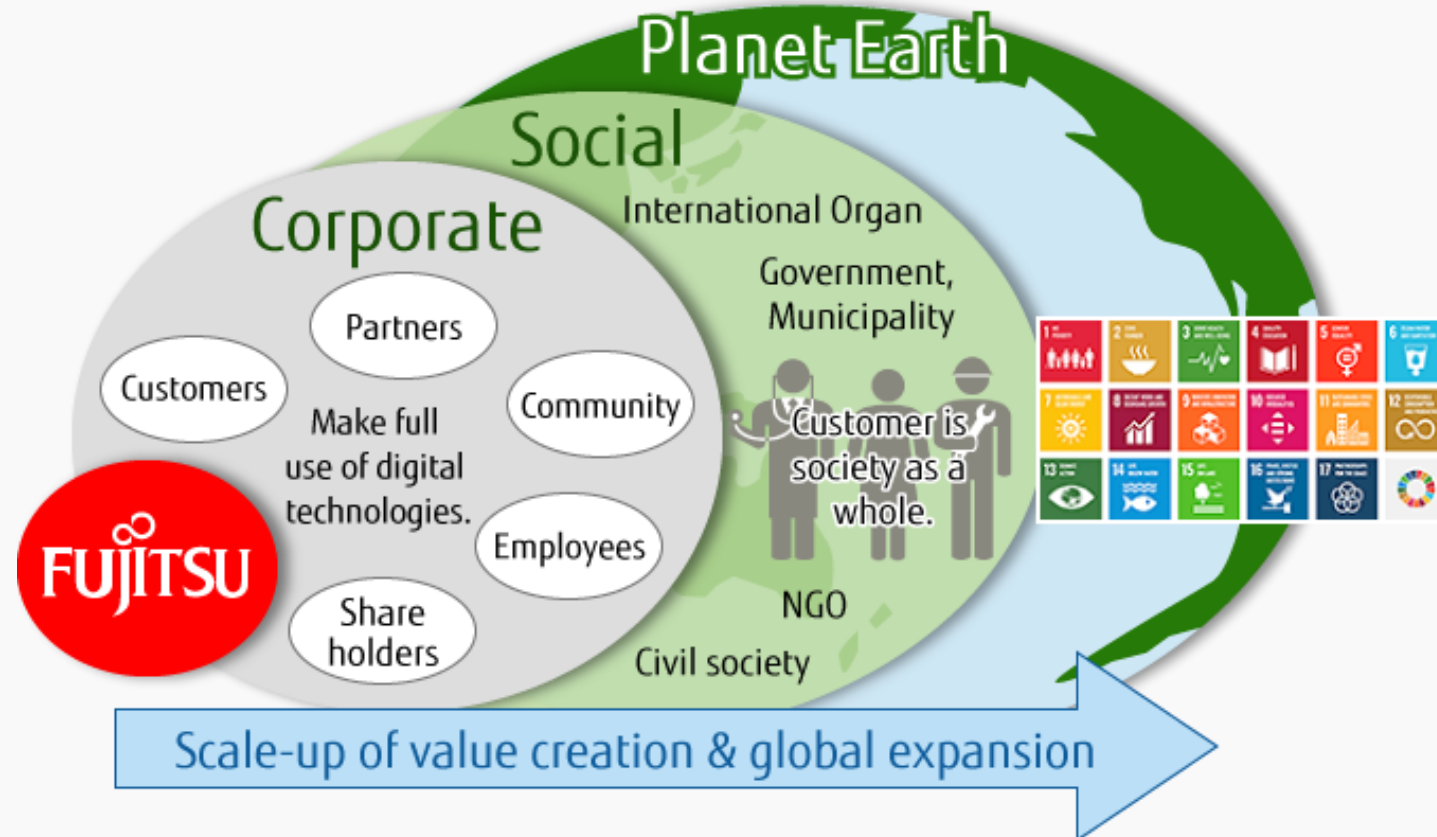

# Actions on SDGs in Fujitsu Group

Fujitsu Group defines "make the world more sustainable by building trust in society through innovation" as "Our Purpose" in Fujitsu Way, that is, its corporate philosophy, to deliver value for customers through technologies and to contribute proactively to the transformation of society.

We recognize that ICTs have something to do with all 17 Sustainable Development Goals (SDGs), now that they are essential factors for the life of the people and many of business activities. Therefore, we believe the philosophy stated in Fujitsu Way can be harmonized with the vector of SDGs.

We, based on SDGs, deliver value to customers, with digital technologies. We believe it must be the way to contribute to achieving SDGs that the value, through customers' customers, will be extended to the society as a whole, and eventually to the world as a whole.

# Actions on SDGs in Fujitsu Frontech Group

Contribution to the achievement of SDGs in a forward-looking manner is the social responsibility of all companies, because they will not be able to run own businesses continuously unless Environment, Social and Economy are kept sustainable. We have been taking broad actions on SDGs to resolve not only environmental issues such as climate change but social and economic ones, since we noticed the importance of SDGs at an early stage.

# Contributable Areas to SDGs by Fujitsu Frontech Group

We, through the compliance with Fujitsu Way as well as establishment and practice of "Fujitsu Frontech Purpose", strive to contribute to the achievement of SDGs. Concretely, we establish the targets associated with SDGs such as "Climate" and "Resource circulation" in "[Fujitsu Frontech Environmental Action Plan](#)", and take actions in the whole Group. We push forward with our activities for the sake of more SDGs being achieved, by using our cutting-edge technologies and know-hows that we have developed, as well as by continuing to promote and deepen the conventional activities such as the development and delivery of our green products excellent for energy / resource efficiency, and "Corporate Citizen" through our contribution to local community and donations.

The following are examples that we can contribute in each category of Environment, Social and Economy and 17 goals of SDGs.

## SDGs Promotion Structure

We organize "Environmental Business Committee", whose chairman is a president, with the approval of our "Business Committee", composed of directors and executive officers involved in our business execution, to discuss comprehensive issues including SDGs, to consider necessary measures etc. and to decide on them.

In addition, as for Diversity and Inclusion (D&I), we establish "Human Rights Promotion Committee" chaired by the head of human resources to promote activities such as education on human rights.
