No.	Category	Description	Scenario #1		Scenario #3	
			FY2030	FY2050	FY2030	FY2050
i	Risks related to natural disasters and degradation of the natural environment	Damage to our company's assets through natural disasters	Medium	Low	High	High
ii	Risks related to natural disasters and degradation of the natural environment	Impact on operations due to chronic degradation of the natural environment	Medium	Low	High	High
iii	Risks related to natural disasters and degradation of the natural environment	Increased operational costs due to decreased water intake availability and reduced water quality	Low	Low	Medium	High
iv	Risks related to natural disasters and degradation of the natural environment	Decline in activity of customers using our products and services due to escalation in natural disasters	Low	Low	High	High
v	Risks related to natural disasters and degradation of the natural environment	Cost of environmental restoration relating to damage of wastewater treatment facilities and sewage overflows due to flooding or heavy rain	Medium	Low	High	High
vi	Risks related to the supply chain and procurement	Interruption to supply chains due to worsening natural disasters	Low	Low	High	High
vii	Risks related to the supply chain and procurement	Impact on IT infrastructure procurement due to chronic degradation of the natural environment	Low	Low	High	High
viii	Risks related to the supply chain and procurement	Impact on procurement of parts for manufacturing due to chronic degradation of the natural environment	Low	Low	High	High
ix	Risks related to the supply chain and procurement	Increased energy procurement costs due to increased utilization of renewable energy	Medium	Low	High	High
x	Risks related to the supply chain and procurement	Increased procurement costs due to strengthened environmental rules and regulations regarding the supply chain	High	Medium	High	High
xi	Risks related to the supply chain and procurement	Increased procurement costs due to resource depletion and heightened competition for scarce resources	Medium	Low	High	High
xii	Risk related to response to stronger environmental laws and regulations	Increased operation costs due to stronger environmental laws and regulations	High	Medium	Low	Low
xiii	Risk related to response to stronger environmental laws and regulations	Increased disclosure costs due to stronger information disclosure requirements	High	Medium	Medium	Medium
xiv	Risks related to development of new technologies and services	Increased cost of new technology development related to response to changes in customer requirements	High	High	High	High
xv	Risks related to development of new technologies and services	Decline in competitiveness and deterioration of reputation due to inadequate nature-based response technology development and products and services	High	High	High	High
xvi	Risks related to talent acquisition	Impact on recruitment of superior talent due to insufficient nature-related action	High	High	Medium	Medium
